

# LOGARITMOS

1. Completa los espacios para que se cumplan las siguientes las igualdades y luego escribe el resultado de cada logaritmo:

$$a. 2^{\boxed{3}} = 8 \longleftrightarrow \log_2 8 = \boxed{3}$$

$$b. 5^{\boxed{2}} = 25 \longleftrightarrow \log_5 25 = \boxed{2}$$

$$c. (-9)^{\boxed{2}} = 81 \longleftrightarrow \log_{-9} 81 = \boxed{2}$$

$$d. 3^{\boxed{4}} = 81 \longleftrightarrow \log_3 81 = \boxed{4}$$

$$e. 7^{\boxed{0}} = 1 \longleftrightarrow \log_7 1 = \boxed{0}$$

$$f. (-2)^{\boxed{5}} = -32 \longleftrightarrow \log_{-2} -32 = \boxed{5}$$

$$g. (-6)^{\boxed{3}} = -216 \longleftrightarrow \log_{-6} -216 = \boxed{3}$$

$$h. 8^{\boxed{1}} = 8 \longleftrightarrow \log_8 8 = \boxed{1}$$

2. Resuelve los siguientes logaritmos:

$$a. \log_3 9 = \boxed{2}$$

$$f. \log_7 343 = \boxed{3}$$

$$k. \log_{-5} 1 = \boxed{0}$$

$$b. \log_3 27 = \boxed{3}$$

$$g. \log_2 32 = \boxed{5}$$

$$l. \log_9 9 = \boxed{1}$$

$$c. \log_{10} 100 = \boxed{2}$$

$$h. \log_9 1 = \boxed{0}$$

$$m. \log_{56} 56 = \boxed{1}$$

$$d. \log_2 16 = \boxed{4}$$

$$i. \log_{-3} -27 = \boxed{3}$$

$$e. \log_5 125 = \boxed{3}$$

$$j. \log_{126} 1 = \boxed{0}$$
